Nick Hendrix Explains the Purpose and Some of the Assumptions of Artificial Reefs

According to Nick Hendrix artificial Reefs provide shelter, calm waters, and influence water currents so that fish save energy while swimming against the current. They also attract smaller organisms which are vital sources of Food for different marine species, and they serve as visual reference points for fish that forage away from the reef and increase the all over reef area which can host a larger number of reef ...

These reefs, if properly constructed and properly buoyed, can be used to enhance existing rough bottom habitat, develop quality fishing ground close to access are Artificial Reefs provide shelter, calm waters, influence water currents so that fish save energy while swimming against the current.

They also attract smaller organisms which are vital sources of Food for different marine species.

Morehead City Rotary Club Has A Change of Venue

The Morehead City Rotary Club is now meeting at Cox's Restaurant. Our old meeting place was not adequate for our needs. Often, we were asked to meet in a space much too small to accommodate our membership. And if we used the larger space in the restaurant, we were charged \$50.00.

Another advantage of meeting at Cox's Restaurant is the difference in the bill of fare. Cox's menu is geared to southern appetites with the emphasis on homey cooking at a reasonable price. Alors, *bon appetite, les amis. appétit*
