Volume 2, Issue 15

Bill Ward Teaches Rotarians How To Save on Electric Bills

Bill Ward gave the following tips to become more energy efficient with lights throughout your home:

- * Turn off lights when leaving a room.
- * Provide task lighting over desks, tool benches, etc. so activities can be carried on without illuminating entire rooms.
- * If possible, put lamps in corners of rooms, where they can reflect light from two wall surfaces instead of one.
- * Use compact fluorescent bulbs in fixtures that are on for more than two hours a day. Compact fluorescent bulbs will give an incandescent bulb's warm, soft light, while using up to 75 percent less electricity. They also last about 10 times longer. Typically, a 23-watt compact fluorescent bulb can replace a 90- or 100-watt incandescent bulb.
- * Install photoelectric controls or timers to make sure that outdoor lighting is turned off during the day.

The Four-Way Test

1. Is it the TRUTH?
2. Is it FAIR to all concerned?
3. Will it build GOODWILL and BETTER FRIENDSHIPS?
4. Will it be BENEFICIAL to all concerned?"

* Wrap your water heater in an insulation blanket.

* Lower the thermostat in the winter to about 68 degrees.

The main focus of Bill's talk was centered around fluorescent lighting. According to Bill, this is one thing everyone can do to lower electric bills.

Ace of Spades A New Game Starts Tonight

TONIGHT'S PROGRAM

Ever stop to think of what happens to storm water runoff...or exactly what storm water runoff is? David Bradley's speaker tonight can tell us. John Langdon, County Manager, will present an overview of storm water runoff and the best methods for managing the problem before it can do irreparable harm.

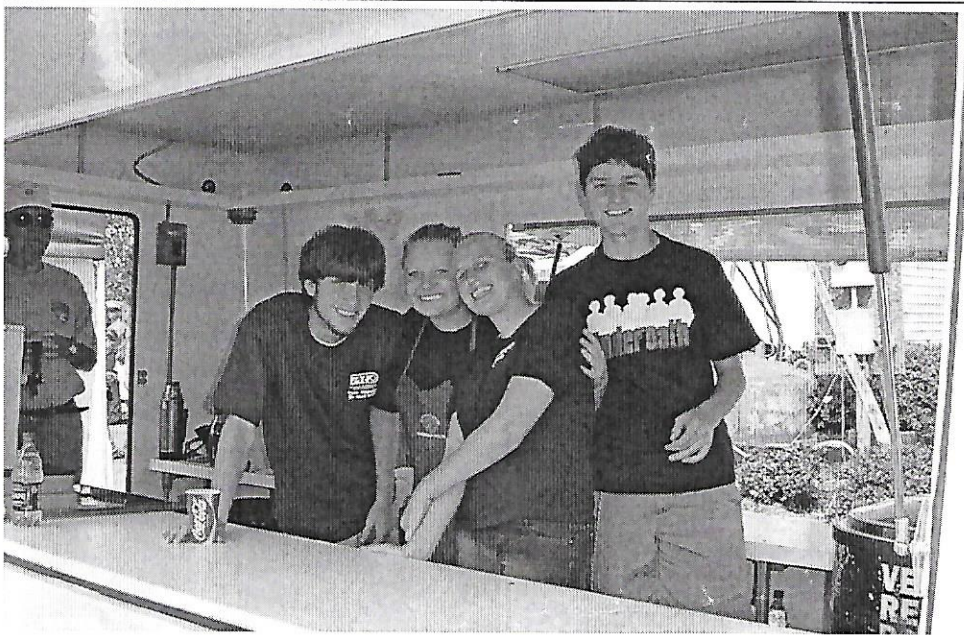

Some People Are Born Lucky

Stanley Harrell Draws the Ace of Spades and wins just over \$200.00.
